

DEBMALYA SARKAR

Strategy · Product · Data · Turning ambiguous problems into measurable impact

United States · +1(814) 954-2547 · debss@umich.edu · [LinkedIn](#) · [Portfolio](#)

SUMMARY

Product manager with 4+ years across AI products, enterprise analytics, and workflow transformation. Combines empathy-driven discovery, prioritization, and cross-functional execution to turn ambiguous problems into measurable outcomes.

SKILLS

Product & Strategy: Customer discovery & user interviews, job stories & personas, product strategy & roadmapping, prioritization & backlog, build-vs-buy decisions, competitive analysis, market sizing & business modeling, go-to-market

AI & Technical: Claude API, multi-agent / agentic systems, RAG, prompt engineering, voice AI, Python, SQL, Snowflake, ML & forecasting (LSTM, Prophet), Power BI, Tableau, Salesforce, Jira, Agile/Scrum, Six Sigma

EXPERIENCE

Purdue University

Jul 2026 – Present

Product Lead – Veterinary Diagnostics

West Lafayette, IN

- Lead product strategy and a phased roadmap for a diagnostic workflow platform serving university and USDA labs, partnering with a faculty diagnostics expert.
- Ran discovery across a startup and two labs and surfaced the core blocker—no shared standard, each lab on its own private LIMS fork—then scoped the connective LIMS layer that instruments, robotics, and computer vision all depend on; software now piloting.

University of Michigan, Ross School of Business

Jun 2026 – Present

Product Lead & Builder – AI Interview Coach

Ann Arbor, MI

- Design and build Erika, a 0-to-1 voice AI interview coach launching across three Ross courses in fall 2026, training students to ask empathetic, open-ended discovery questions instead of leading or pitching.
- Owned the build-versus-buy call across voice AI platforms and built a RAG-backed feedback loop on the Mom Test framework; re-architected it after the first version fired seven backend calls per question and left dead air mid-conversation.

University of Michigan, School of Information

May 2025 – Aug 2025

Data Consultant, Engaged Learning Office

Ann Arbor, MI

- Led client discovery with 30+ external partners to scope project proposals for UMSI's client-based courses, translating business needs into actionable student project briefs.
- Managed a pipeline of 50+ active projects in Salesforce, coordinating across faculty, clients, and students to ensure alignment on deliverables and timelines.

Deloitte USI (Ball Corporation), Strategy & Analytics

Sep 2020 – Aug 2024

Consultant, Product Support & Analytics

Kolkata, India

- Drove process improvements on an enterprise analytics platform serving 20,000+ users by analyzing ticket and usage patterns in Power BI, cutting average resolution time by 40%.
- Synthesized user feedback and support-ticket trends to identify top pain points; prioritized feature enhancements that increased self-serve adoption and reduced escalations by 25%.
- Led development of AI-powered code copilots and document-summarization tools, accelerating code development by 30% and reducing documentation-review time by 40%.
- Re-engineered a legacy SQL data pipeline using Six Sigma methods, reducing runtime from 80 to 8 hours and unblocking downstream production decisions.
- As Scrum Master for a 10-person cross-functional team, increased sprint completion from 65% to 90% through backlog prioritization and stakeholder alignment.

Swiggy

Jan 2020 – Jul 2020

Analytics Product Intern

Bangalore, India

- Built and shipped ML forecasting pipelines using LSTM and Prophet across 500+ cities, reducing prediction error by 20% and informing real-time fleet-allocation decisions.

PROJECTS

Tatter, Outdoor Gear Repair Product

IPD Ross Business School Challenge Winner, Team of 5

Ann Arbor, MI

- Led product & services strategy for an app-plus-repair-kit system that helps outdoor enthusiasts diagnose and fix worn gear at home; conducted 45 user interviews and built the product roadmap.
- Defined a diagnostic-to-kit experience across five launch kits; shipped a working prototype that won the IPD Challenge.

QuiTam Copilot, Independent Project

Product & Strategy

Remote

- Led product and strategy for a multi-agent AI tool that maps raw whistleblower evidence to the four legal elements of a False Claims Act case—a market that recovered a record \$6.8B in FY2025; validated through 20+ attorney interviews.
- Built the first MVP in a 24-hour hackathon on the Claude API, coordinating four specialized agents over a shared document graph; tuned prompts and context-window use to make build-versus-defer tradeoffs.

LEADERSHIP

- **Impact Day Cluster Lead, Deloitte:** Led 100+ volunteers for CSR initiatives; coordinated weekly NGO visits to teach STEM.
- **AI Club Head, Manipal:** Grew club from 3 to 10 members; delivered a working drone prototype for medical delivery.

EDUCATION

University of Michigan

May 2026

M.S. in Information, Product and Data Focus; GPA: 3.7

Ann Arbor, MI

Manipal Institute of Technology

Jul 2020

B.Tech. in Computer & Communication Engineering, Minor in Big Data

Manipal, India
